

We have an agreement with the National Health Service and accredited in "A Super" for spa treatments:

- Mud-balneotherapy
- Mud therapy
- Balneotherapy
- Inhalation treatments

This allows you to carry out one cycle of spa therapies per year for a maximum of 12 mud-balneotherapy or 12 balneotherapy or 24 inhalations/aerosol in a single ASL prescription, issued by the general practitioner who must indicate the type of treatment and the pathology.

In order to carry out a mud therapy cycle it is necessary that the prescription states "mud therapy cycle" or "cycle of mud and therapeutic baths" and the diagnosis "arthrosis, osteoporosis, or extra-articular rheumatism".

If the patient needs inhalation treatments, the prescription must contain the following prescription: "Cycle of inhalation treatments" or "Cycle of inhalations and aerosol" and the diagnosis "pharyngitis, rhinosinusitis or bronchitis".

Upon arrival at the hotel and before starting the treatment, our Health Director will evaluate during the medical examination (mandatory) the state of health of the guest.

Both inhalation treatments and mud therapy can be prescribed by the family doctor with ASL prescription.
